Languages: HTML, CSS, JavaScript, SQL, MongoDB, React, JQuery
Applications: Node.JS, Git, Bootstrap

PROJECTS

8-bit-bartender | https://github.com/Eelektrick/8-bit-bartender |
https://eelektrick.github.io/8-bit-bartender/
- Phone app that a person can enter any mixed drink and find the ingredients and the nutrition value of the drink as well.
- Responsibilities were helping create the javascript file to operate the API calls and what information to show when the different buttons were clicked. Also made final adjustments to the read.me for the project.
- Javascript, ajax, moment.js for clock, and 2 APIs that can be found in my github

Flix-Nut | https://github.com/Eelektrick/flix-nut | **https://flix-nut.herokuapp.com/**
- Phone app and web page that users can search and rate movies and see what others rated the movie as well.
- Responsibilities were helping create the front end look of the project through the handlebars files, all visuals had my final say with one other project member.
- Handlebars that contain the HTML, multiple javascript files, and 1 API that can be found in my github

Shifty-Planner | https://github.com/Eelektrick/Shifty-Planner |
https://shifty-planner.herokuapp.com/
- Phone app and web page that users can login and see their individual work schedule and trade shifts with other employees.
- Responsibilities were creating the login page using Auth0 and helping another project member with the CSS and layout of the pages
- React, moment.js for the schedule, JavaScript, API calls, MongoDB, and Auth0 that can be found in my github
